

PAUL STEVENSON

EXECUTIVE VICE PRESIDENT - McCormick Stevenson

Paul became a principal of McCormick Stevenson in 2003 and has helped grow the company to over \$5.0M in sales in 2019. Paul has over 30 years of experience in design engineering, primarily in Defense and Aerospace. He is largely responsible for the delivery of engineering services to clients such as Northrop Grumman, Honeywell and General Dynamics. Paul also assists with client relationship management and business development.

Paul is passionate in promoting an engineering career to young people, and giving back to the profession through:

- Activities both locally and nationally on behalf of the American Society of Mechanical Engineers (ASME)
- Volunteering as a Governor (2020-2022) of ASME and on the Audit Committee
- Supporting the University of South Florida's College of Engineering by speaking with student organizations and Leadership in Engineering Course: The Value of Networking

Paul began his career as a draftsman in the early 80's and worked his way through college to earn his Bachelor of Science in Mechanical Engineering from the University of South Florida in 1995.
