

# NAT McCORMICK

DIRECTOR, ENGINEERING & PROGRAMS  
McCormick Stevenson

**Nat joined McCormick Stevenson in 2007** as a mechanical drafter. He couples an inventive and collaborative mindset with deep expertise in computer-aided mechanical design. This combination has allowed Nat to solve our customers' design and engineering challenges while helping to grow an exceptional product development team. Nat is responsible for ensuring McCormick Stevenson always meets our customer's expectations and that we maintain the tools and resources necessary to deliver high quality engineering solutions on time and on budget. Nat earned his bachelor's degree in mechanical engineering during his tenure here at McCormick Stevenson. This hands-on, bottom-up approach instilled in him an appreciation and respect for the practical demands of the engineering profession and its enabling business operation.

**Nat has a passion for service to his local community as well as our Nation's Defense. He is committed to helping others live a life of purpose and meaning as evidenced by the activities he chooses to support:**

- Assisting student organizations and connecting with aspiring young engineers through active engagement with the University of South Florida College of Engineering (his alma mater).
- Ongoing and long-term support for the Tampa Bay Engineering Internship Alliance (TBEIA)
- Leadership and commitment to his church and his community

Outside of work Nat enjoys spending time with family and friends. He can usually be found outdoors - whether it's fishing, golfing, or cheering on one of his five children from the sideline.
